Team 3

Weather or Not
10/12/21
11:30 AM
Phillips 413

Team Members
- Zachary Menter (Facilitator)
- Chris Lofgren
- Elaine Franta
- Nick Pronschinske

Previous Weeks Goals
No previous week

Meeting Notes
- Do we want fixed orientation?
    - All of our weather apps have fixed orientation, so we might want to do that
- Need navigation menu
- Activity 1
    - Overview of the weather for today
- Activity 2
    - Hourly weather for the day
- Activity 3
    - Weekly weather
- Activity 4
    - Suggest days to do a given activity
    - Have a fragment that you can swipe to that shows suggested activities for that day
- Activity 5
    - Search for an activity and suggest days
- We probably want to ask for location, but if they don't want to share location, we can allow for the user to select a location
- We need to think about what we may want to split into fragments versus activities
    - Activity 4 might have some fragments

Goals for Next Week
- Create a design for each of our activities
    - Zach: Activity 1
    - Nick: Activity 2
    - Elaine: Activity 3
    - Chris: Activity 4
